WALES ROAD GARDENS
A. G. BRITSCH, Proprietor
STATION A
TOLEDO, OHIO
OUR "WORTH WHILE" GARDEN

At "BRIE BLAN" the country home of A. G. Britsch (proprietor of Wales Road Gardens) may be seen during their blooming season the really "WORTH WHILE" Peonies, Iris and Gladioli, here; each year the new introductions of the world's best hybridizers are planted for observation along with the old standards that have proven worthy in the Trial Gardens.

Each year our daily observation records tell us,—to discard many, grow some on for further observation, that some are really as good or even better than those given us in previous years, and should be added to our permanent collection. The varieties thus selected are grown on as a part of the stock of the Wales Road Gardens, where the standard Commercial varieties as well as the newer additions are grown for the wholesale and retail buyer.

From our daily records we are able to give our patrons the benefit of our experience during the past twelve years with these beautiful flowers and are always pleased to offer a fair and unbiased opinion on the merits of each particular variety in comparison to the standards set forth by the several National Societies, as to their worth in the commercial, show or landscape class.

GLADIOLI

We have listed in our booklet (with the originator's description) only those varieties of Gladioli which we can supply from our own grown stock, that we may be certain of their blooming true to name, healthy stock, properly grown and cured, that your selected variety may give you the best possible bloom in your own garden next season.

We grow a large acreage of the standard varieties at Wales Road Gardens and offer them in all sizes and bulblets at wholesale, while we exert every care to have our stock absolutely true to name we can not be responsible for results other than to replace stock found untrue or refund the purchase price.

We wish to establish a confidence with you and expect to earn it by our method of fairness in our business relations, giving you that which we know will give you the desired result. Varieties that are true, good healthy stock, at the right price, and want you to feel at liberty to ask our service in aiding you with your growing problems at all times.
PRICES:—The prices listed on gladiolus bulbs are for one large bulb one and one fourth inch in diameter or over, 12 bulbs at ten times the price per single bulb (one variety,) 100 bulbs at eight times the dozen price (one variety), 25 bulbs at the hundred rate. Smaller bulbs and bulblets can be furnished of most varieties listed.

Half Size Bulbs (i. e. bulbs from one-half inch to one inch in diameter) at one-half the large bulb price. Bulblets of any variety, 100 bulblets at the dozen price of large bulbs of the same variety (i. e. at 10c list, 100 bulblets $1.00). We will not substitute, unless requested to do so. Please state in your order whether to substitute smaller bulb, a similar variety or to refund your remittance.

TERMS:—Net Cash with all orders. A deposit of 25% of the amount of order will hold for future delivery. No charge for package and post free to all parts of the United States or Canada, when order amounts to $1.00 or over, otherwise add 10%.

PLANTING and CARE of GLADIOLI:—

The gladiolus is easily grown. It will do well in any soil but a rich sandy loam is best. They should be planted where they will have plenty of sunshine. Plant any time from the middle of April to the last week in May, placing the bulbs about five to six inches deep and at least four inches apart. The top soil should be kept loose and free from weeds. A thorough soaking once a week, during a severe drought, is necessary for best results, but constant cultivation will do much to conserve moisture.

It is best not to plant Gladioli in the same place many years in succession. New ground each year is best. Should your soil need enriching you will find a good root crop fertilizer, such as bone meal or a good pulverized dry manure best for the purpose.

You will enjoy your Gladioli, and appreciate your bloom more, if each variety is staked and labeled with its proper name.

Dig bulbs in the late fall before they are too ripe, with a sharp knife or shears cut the tops close to the bulb. Dry them in the air and sunshine for a week or two, being sure to protect them from frost at night. Remove the dirt and the old decayed bulb before storing, (to leave this until spring is detrimental to the bulb.) Store in a cool dry cellar.

CUTTING FLOWERS:—

For best results, cut the spike when the first flower opens, leaving at least four or five leaves on the stalk to mature the bulb. Each morning pick off all the wilted bloom, cut off a little of the stem, rinse and give fresh water. Placing them in a cool cellar over night will greatly refresh and improve them.
